

## Mr.Shekar

---

### **Executive Summary:**

- Over 13 years of experience in IT industry with Retail, Banking and Insurance domains.
- Expertise in **SQL Server 2012/2008/2008R2/2005** in SQL Server Development and **Database Administration** with an emphasis on **MS SQL server data base and Business intelligence (SSRS,SSIS and SSAS)** - Administration, design, development, enhancement, and automation, tuning and optimizing databases for highAvailability, Performance and Security.
- Extensive experience with different phases of project (project initiation, project requirement and specification gathering, designing system, coding, deployment, testing, and debugging new and existing client-server based applications).
- Strong technical background along with the ability to perform business analysis and write/maintain effective documentation and specifications.
- Good experience with implementing **DR (Disaster Recovery) solution, High Availability of database servers using Database Mirroring, Replications, Log Shipping and Clustering.**
- Expertise in MS SQL Server Installation, Configuration, Migration and Maintenance.
- Expertise in **ETL,Reporting and Analysis** tools such as **SQL Server Integration Services (SSIS), SQL Server Reporting Service (SSRS), SQL Server Analysis Services (SSAS).**
- Experienced in working with **SQL Query Analyzer, SQL Server Management Studio and Business Intelligence Development Studio**, scheduling jobs with **SQL Server Agent, SQL Server Storage Structures, Index and Security architecture and SQL Profiler**
- Very Good Experience in MSBI Development (**SSRS, SSIS&SSAS**) and MS Excel.
- Experience in **Data analysis, Application/Production support and end user support.**
- Expertise in defining **Database Backup, Recovery and Disaster Recovery Procedures.**
- Extensive knowledge and experience in developing scripts using **T-SQL** for querying against databases and implementing business logic using **Triggers, Views and Stored Procedures.**
- Installed, Configured and Maintained **SQL Server Failover Clustering.**
- Experience with **SQL Server Security and SQL Server Auditing.**
- Very good communication skills, good interpersonal skills & desire to excel, fast learner, hardworking and a versatile team player.

### **Technical Skills:**

**Database:** MS SQL Server 2012, 2008, 2008R2, 2005 and Oracle11g

**Business Intelligence tools:** Microsoft Business Intelligence tools (SSRS,SSIS and SSAS)

**Programming:** C#.net

**DBA:** Database administration of MS SQL Server 2012, 2008, 2008R2 and 2005

**Operating System:** Windows 2008/2003 Server, NT

**Education:** Master of Computer Application (MCA)

### **Professional Experience:**

Tesco- Sr.TechnicalData Analyst

**Project** :Dot com (Online Grocery Shopping) (May-2012 – till date)

**Responsibilities:**

Involved in Source Data Analysis, analysis and designing mappings for data extraction also responsible for Design and Development of SSIS Packages to load the Data from various Databases and Files.

- Experience in using SQL Server Profiler, SQL Server Agent, and Database Engine Tuning Advisor(DTA).
- Rebuilding / Monitoring the indexes at regular intervals for better performance.
- Managed security on Production and Development environments.
- Created and maintained various logins and managed security based on the required access.
- Involved in Database Backup and recovery
- Implemented high availability on the various servers using replication, mirroring and log Shipping
- Scripting the Database Consistency Checks (DBCC), scheduling the scripts to run daily and weekly basis.
- Created various jobs to monitor resources on various servers and to mail the necessary information when threshold was reached.
- Contacted various users in gathering the requirements and documented the necessary changes.
- Technical Analysis, Code Review, Implementation, 24 x 7 production support.
- Developing SQL scripts for maintaining administration tasks.
- Solved critical production problems and performed point in time recovery plans.
- Created various SSIS packages and SSRS report based upon the requirement.
- Implemented different types of Replication Models like Snapshot and Transactional.

Administered the space usage of the various databases for various applications.

**RTBA (Residential Tenancies Bond Authority)(Nov-2010 – May -2012)**

**Responsibilities:**

Involved in Source Data Analysis, analysis and designing mappings for data extraction also responsible for Design and Development of SSIS Packages to load the Data from various Databases and Files.

- Experience in using SQL Server Profiler, SQL Server Agent, and Database Engine Tuning Advisor(DTA).
- Rebuilding / Monitoring the indexes at regular intervals for better performance.
- Managed security on Production and Development environments.
- Created and maintained various logins and managed security based on the required access.
- Involved in Database Backup and recovery
- Implemented high availability on the various servers using replication, mirroring and log Shipping
- Scripting the Database Consistency Checks (DBCC), scheduling the scripts to run daily and weekly basis.

- Created various jobs to monitor resources on various servers and to mail the necessary information when threshold was reached.
- Contacted various users in gathering the requirements and documented the necessary changes.
- Technical Analysis, Code Review, Implementation, 24 x 7 production support.
- Developing SQL scripts for maintaining administration tasks.
- Solved critical production problems and performed point in time recovery plans.
- Created various SSIS packages and SSRS report based upon the requirement.
- Implemented different types of Replication Models like Snapshot and Transactional.
- Administered the space usage of the various databases for various applications.

**Title :** Technical Analyst

**Project:** Chase Bank (Nov-2008 – Nov-2010)

**Responsibilities:**

Involved in Source Data Analysis, analysis and designing mappings for data extraction also responsible for Design and Development of SSIS Packages to load the Data from various Databases and Files.

- Experience in using SQL Server Profiler, SQL Server Agent, and Database Engine Tuning Advisor(DTA).
- Rebuilding / Monitoring the indexes at regular intervals for better performance.
- Managed security on Production and Development environments.
- Created and maintained various logins and managed security based on the required access.
- Implemented the Change data capture in production environment
- Implemented high availability on the various servers using replication, mirroring and log Shipping
- Scripting the Database Consistency Checks (DBCC), scheduling the scripts to run daily and weekly basis.
- Created various jobs to monitor resources on various servers and to mail the necessary information when threshold was reached.
- Contacted various users in gathering the requirements and documented the necessary changes.
- Technical Analysis, Code Review, Implementation, 24 x 7 production support.
- Developing SQL scripts for maintaining administration tasks.
- Solved critical production problems and performed point in time recovery plans.
- Created various SSIS packages and SSRS report based upon the requirement.
- Implemented different types of Replication Models like Snapshot and Transactional.
- Administered the space usage of the various databases for various applications.

**Project:** EMC (Dec-2006 – Oct2008)

**Responsibilities:**

Involved in Source Data Analysis, analysis and designing mappings for data extraction also responsible for Design and Development of SSIS Packages to load the Data from various Databases and Files.

- Experience in using SQL Server Profiler, SQL Server Agent, and Database Engine Tuning Advisor(DTA).
- Rebuilding / Monitoring the indexes at regular intervals for better performance.
- Managed security on Production and Development environments.
- Created and maintained various logins and managed security based on the required access.
- Involved in Database Backup and recovery
- Implemented high availability on the various servers using replication, mirroring and log Shipping
- Scripting the Database Consistency Checks (DBCC), scheduling the scripts to run daily and weekly basis.
- Created various jobs to monitor resources on various servers and to mail the necessary information when threshold was reached.
- Contacted various users in gathering the requirements and documented the necessary changes.
- Technical Analysis, Code Review, Implementation, 24 x 7 production support.
- Solved critical production problems and performed point in time recovery plans.
- Created various SSIS packages and SSRS report based upon the requirement.
- Administered the space usage of the various databases for various applications.
